

Boatbuilding & Marine Carpentry

Seattle, a major port and marine-industry hub, is a perfect place to learn boat building. The two-year program provides you the skills to start a career in wood and FRP boat building, boat repair, or related trades. You'll learn lofting and layout, fiberglass lay-up and repair, wood boat construction and repair, and interior and exterior joinery. Jobs are available in custom and

commercial
boat building
shops and
repair yards
throughout the
Puget Sound
region.

The curriculum
is designed to
provide
practical hands-
on education.
Students learn
the craft by
working on
assigned boat
projects. The
class/shop
atmosphere is
similar to an
actual boat
building shop.
Class sizes vary
from 16-18
students for
each instructor.
The Marine,
Carpentry class
has been
offered since
1936 as a
program of
Edison
Technical
School, which

became part of
Seattle Central
Community
College in
1967.

"The instruction
is relevant to
what industry
needs are
today" said
Spike Nelson,
Marine
Carpentry
graduate. "You
use modern
materials, and
the program
provides you an
extremely good
foundation."
